

NB Diabetes Camp is looking for dietetic students, dietetic interns (or dietitians too !) to work with kids with Type 1 Diabetes being held at Green Hill Lake July 15 – 20th.

This is a great learning opportunity about diabetes for students and a wonderful experience for interns either as part of an internship diabetes rotation or as an elective. For any dietitians who are working towards CDE certification (or re-certification), the new learnings gained at camp are now able to be applied to CDE education credits. You could think of camp as Type 1 Diabetes immersion!

- Green Hill Lake has put a little FAQ and well and example schedule on their website at <http://www.greenhill.ca/diabetes/>
- NB Diabetes Camp has developed a quick and easy application form. Here is the link: <https://form.jotform.com/81004152536244>. Please share this link to any student, interns, resident that you may have been in conversations about supporting camp.

You will learn more about living with Type 1 diabetes than you thought possible – from the experts – the kids living with it day to day.
